Sustainability

# Fastrack your ESG with Our Tech Accelerators

## Data Processing

Developing digital platforms that helps in processing large volume of data and perform complex calculations.

## Reporting

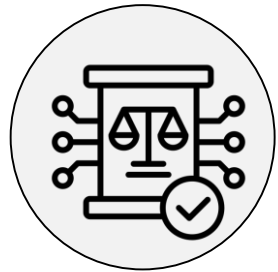

Simplify your ESG reporting through efficient data collection and save time and efforts by generating insightful reports using GenAI.

## Automation

Helping taxonomy auditors with a reporting instance that ensures compliance and drastically reduces the auditing costs and efforts.

# Drive sustainable business outcomes with our tech solutions

---

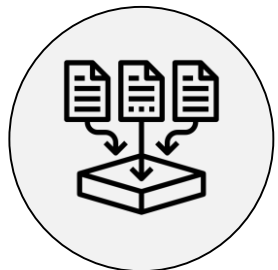

## Automate ESG Audit

Automate ESG audits for seamless compliance monitoring and enhanced sustainability performance, streamlining processes and increasing transparency.

## Make Reporting Intelligent

Forget excel sheets and effortlessly produce reports tailored to specific frameworks utilizing intuitive wizards that simplify and automate the reporting procedure.

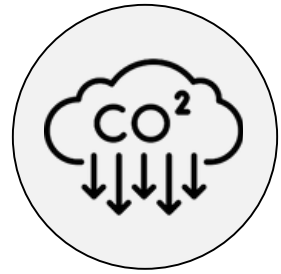

## Manage ESG data from Disparate Systems

Access consolidated ESG data effortlessly by integrating data from disparate systems in a single platform.

# Drive sustainable business outcomes with our tech solutions

---

## Reduce Carbon Footprint

Efficiently track and report carbon footprint data, ensuring accuracy and compliance with environmental standards.

## Utilize Rules Engine based on ESG Datasets

Utilize a rules engine powered by ESG datasets for robust analysis and decision-making, enabling comprehensive assessment and optimization of sustainability initiatives.

## Monitor ESG Benchmarks

Efficiently track ESG benchmarks, ensuring adherence to predefined sustainability criteria and enabling real-time performance monitoring.

# Success Stories

---

See how organizations are driving efficiencies that are good for business and the planet

# ESG Compliance & Supply Chain Sustainability

---

- Automated compliance audit workflow.
- ESG reporting through efficient data collection.
- Reports on European Sustainability Reporting Standards and helps ensure your CSRD compliance
- Based on ESRS standards and developed in cooperation with auditors.
- Get the latest updates on the updated legal and format requirements.
- It is a tool to gather, compare, and report your Taxonomy-related data.

# Carbon Emission Calculating Platform

- Automated carbon emission and energy costs tracking for businesses.
- The carbon emissions are tracked via business accounting software and relevant data sources.
- Automatic carbon emission reduction suggestions if the value exceeds the threshold.
- In case carbon emissions are exceeded and there are no chances of reduction, then as per government norms, carbon credits can be purchased by the organization.

# Why choose us?

---

- Proven expertise in cutting edge technology services
- All in one solutions for compliant and efficient reporting on all core ESG legislation
- All major ESG legislations on single platform no more excels are required, everything integrated into one system
- Leverage pre-built components and products for accelerated development
- Transparent processes to drive overall success
- Knowledge of established mortgage industry practices
- A win-win partnership based on trust

# THANK YOU!
